SUMMARY

Backend Developer skilled in Java, Spring Boot, MySQL, REST APIs, JPA/Hibernate, and JWT Authentication. Passionate about building scalable backend systems and integrating AI-powered solutions while following clean architecture and best development practices.

PROJECTS

VerifyLayer AI (May 2026 – Present)

Developed scalable REST APIs using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL. Implemented JWT authentication, integrated AI APIs, and designed secure backend architecture following layered architecture principles.

Website Crawler Chatbot (Dec 2025 – Feb 2026)

Created intelligent website crawler that automatically explores and extracts content from 18+ pages including Home, About, Services, Contact, and Blog sections. Built an AI-powered QA system using the Perplexity Pro API to answer user questions based on crawled website data with clean markdown processing.

Alt-Text Extractor Chrome Extension (Jul 2025 – Nov 2025)

Built a Chrome extension that automatically scans web pages, extracts ALL image alt text attributes for comprehensive accessibility analysis. Critical tool for QA teams, web developers to instantly detect missing alt text across entire websites. One-click popup interface with copy-to-clipboard functionality that saves hours of manual testing for multiple development teams.
